## CoSy Update :

- Sister Joyce has a great nose for real estate . And once she sniffs them out , she has a great eye to judge them . The beginning of the year , we purchased a derelict old dairy along Bear Creek Park in Lakewood in a short sale . The 7 acres are about the area of 20 lots on the adjacent streets . We've renovated the modest house on the property and the stable . We are finishing up the bunkhouse now . All the horses , and most of the dogs and cats have now moved down there .
- I've been invited to create an *Essential Physics* page on [Heartland Institute's](#) new [Climate Wiki](#) .
- I got myself invited to the venerable Minnowbrook APL implementers conference in the Adirondacks the third week of September where I'll be presenting my progress on [4th.CoSy](#) and picking some of the brightest minds who actually know how you are supposed to implement a language . I'm strongly thinking of avoiding TSA's humiliating sheeple training by renting a car and taking a couple of weeks revisiting old haunts and friends around from Chicagoland to NYC , and back thru Kentucky .
- This August 5th will be [our brother Jack's](#) 70th birthday .
